

Terms and Conditions for Malware and Virus Assessment

These Terms and Conditions govern the performance of a malware, virus, and cybersecurity assessment. By proceeding with the assessment, the recipient acknowledges and agrees to the terms set out below.

1. Purpose of Assessment

The assessment is intended to identify potential indicators of malware, viruses, trojans, ransomware, spyware, and other malicious software that may affect the security, integrity, or availability of systems and data.

2. Scope of Services

The assessment may include analysis of operating systems, running processes, startup items, scheduled tasks, installed applications, browser extensions, security logs, network activity, and other relevant artefacts.

3. Limitations

No security assessment can guarantee the detection of all threats, vulnerabilities, or malicious activity. Findings are based on information available at the time of the assessment.

4. Authorization

The recipient authorizes the performance of reasonable assessment activities required to evaluate the security status of the systems within scope.

5. Findings and Recommendations

Any findings, observations, or recommendations provided are advisory in nature and should be reviewed before implementation.

6. Data Handling

Information reviewed during the assessment should be handled confidentially and only used for assessment purposes.

7. System Availability

Although reasonable care will be taken, assessment activities may occasionally affect system performance or availability.

8. Limitation of Liability

The assessment provider shall not be liable for indirect, incidental, consequential, or special damages arising from the assessment.

9. No Warranty

The assessment is provided on an 'as-is' basis without guarantees regarding future security outcomes.

10. Acceptance

Proceeding with the assessment constitutes acceptance of these terms and conditions.

Acknowledgement

■ I agree to the Terms and Conditions above.
